

Application Development for SAP

Flex to business imperatives faster with scalable, cost-effective, high-value solutions.

Reduce your SAP application development time by up to 30 percent with the help of Sphere Services. Launching your final product will be seamless, as our team of developers produce high-quality, low risk SAP applications that are quick-to-market.

The Right Team in Your Corner

With over a decade of experience developing business critical applications, Sphere Services will consistently deliver SAP solutions that are on time, on budget, and hit your key product requirements everytime.

Our teams are diverse in their expertise, which allows for unique perspectives and collaboration. Having the right team in your corner will allow your business to flex a great final product with confidence.

Sphere's Approach

Before development, we are sure to gain a deep understanding of your product requirements and the goals you're trying to achieve when it comes time to launch. Sphere prioritizes testing and iteration to produce a cleanly designed, well functioning product. Our approach includes:

- Gaining a clear knowledge of your current IT landscape
- Weighing the use of standard SAP for cost-effective functionality
- Automating testing scripts
- Consulting with our business team to ensure functional specifications are being met
- Develop a thorough proof-of-concept (POC) to validate assumptions
- Implement a robust series of testing, including unit tests, integration, tests, SQA, and more.

Deliverables

Custom developed solutions, which solve your business problem, enhance the application, or customize the application to your needs

Functional and technical specification document, which documents current state and retains IP used for future reference

Test case and scripts support documents to ensure custom applications are tested and validated

Knowledge transfer ensures that client has all the information required to support the application

Development Proficiencies

Sphere Services has a comprehensive SAP development package to meet all of your needs.

Advances Business Application Programming (ABAP) Development
