# Flexible and Efficient SAP Cloud Migration

A secure virtual cloud hosting solution for your business

Build and manage your SAP in the cloud with modernization, management, operational, and advisory services from Sphere Software. Migrating to the cloud allows for more flexibility and efficiency, all while reducing the costs and risks of running your business.

Benefits of Cloud Migration

Running your SAP in the cloud poses numerous benefits for your organization during this crucial growth period. Operating in the cloud means you can access business data on-the-go, anywhere in the world with no fault. The system is scalable, and can be tailored to fit the specific needs of your company. Maintenance and hardware costs are no longer an issue with Sphere as your offshore provider. With more than a decade of experience, Sphere Services can provide you with industry-specific cloud solutions -- making you more flexible, competitive, and reducing overall risk.

Cloud Migration and Hosting Process

Sphere provides end-to-end cloud and migration hosting services, giving you the ability to grow your organization fast and efficiently. Our private cloud is highly secure, giving you the confidence to migrate your SAP applications.

- Modernization

- Management
- Advisory

SAP Services

From business intelligence and analytics to implementations and operations, Sphere will be by your side during phases of planning, building, and managing your SAP in the cloud.

SAP Solutions

Sphere will enhance your existing applications with performance optimization tools, provide custom development and lifecycle management solutions, and take an industry-specific approach to best fit your needs.

With some of the industry's leading consultants in SAP and cloud migration, Sphere understands how important it is for your organization to harness the versatility of the cloud. Scaling at a minimal cost, however, is also just as important. This is why we provide our services as a pay-as-you-go package, giving you the opportunity to choose only the services you need.

You can manage of the payment of these services with either a fixed cost allocation or based off your consumption. Either way, you'll get to tap into Sphere's global capacity for business expansion, enable a hosting environment for both SAP and non-SAP applications, and receive complete lifecycle management and support.

Sphere will work with you to determine the right fit.
